Búsqueda de la tabla en PgAdmin

He hecho esta práctica en un hueco del trabajo así que mi escritorio y sistema son distintos. Quise aprovechar que aquí he instalado odoo varias veces en distintos métodos y ya tenía instalado pgAdmin.

Tengo pgAdmin 4 instalado y accedo al server desde la web con localhost y el puerto correspondiente.

Consulta de datos

Busco la tabla res_partner y ejecuto un query para ver los datos que yo quiera comprobar dentro de la base de datos de Odoo.

The screenshot displays a multi-tasking environment. On the left, a web browser shows the 'educación a distancia' website profile for Christian Fernández Gómez. In the center, a Google Docs document contains the text: 'Busco la tabla res_partner y ejecuto un query para ver los datos que yo quiera comprobar dentro de la base de datos de Odoo.' On the right, a terminal window shows a SQL query being executed in a PostgreSQL database, displaying a list of records from the res_partner table.
